FRANKLIN HOSPITAL INSTALLS PROVEN HOSPITAL INFORMATION SOLUTION FROM INTRANEXUS

Community hospital is new addition to highly rated IntraNexus® Client List

Virginia Beach, Va. (August 9, 2006) – IntraNexus Inc., a leading provider of HIS solutions for nearly 15 years, announced today the addition of Franklin Regional Hospital, located in Franklin, New Hampshire and a subsidiary of LRGHealthcare, to the growing list of hospitals using IntraNexus for Patient Access, Patient Financial Management, and Clinical Data Systems. IntraNexus anticipates that the new LRGHealthcare solution will go live in January 2007.

LRGHealthcare was formed in 2002 with the merger of Franklin Regional Hospital and Lakes Region General Hospital to better serve the community healthcare needs of the Lakes Region of central New Hampshire. This has included the decision to use common hospital information system applications for both hospitals resulting in the selection of the IntraNexus Patient Access, Patient Financial Management, and Clinical Data Systems solutions at Franklin Regional Hospital.

“Our Hospital Information System support transitioned to IntraNexus, Inc. in 2001 when they purchased the product we were using,” stated Henry Lipman, LRGHealthcare Executive CFO. “We are happy with the direction that IntraNexus has taken with the product and we are very pleased with the support we receive from them. We’re happy to include them in the merger with Franklin.”

“We are very pleased to add Franklin Regional Hospital to the IntraNexus client list and we’re happy our HIS solution can help Franklin realize their goals of improving patient care and lowering their accounts receivable days,” stated Kathleen Patentreger, IntraNexus Vice President, Client Services. “IntraNexus and LRGHealthcare have had a long, mutually beneficial relationship since 1995 and we look forward to the same type of relationship with Franklin.” Ms. Patentreger added, “We are performing a Master Patient Index (MPI) conversion which involves looking at the existing Franklin patients on the foreign system, checking for duplication with existing Lakes patient records, and then pulling the accurate records forward for Franklin to use, helping to eliminate redundancy and improve Patient Access.”

KLAS, an independent market research firm that rates hospital software systems, has ranked the IntraNexus ALLEGRA® solution in the top 10 among all of the Acute Care Registration, Scheduling, and Patient Accounting solutions surveyed in the HIS market. In the most recent Mid-Year Report Card, IntraNexus had the highest percentage positive commentary for Community HIS as reported by the participating hospitals.

About LRGHealthcare

LRGHealthcare has a century-long tradition of providing quality service to the Lakes Region of New Hampshire. Founded in 1893, the hospital, operating under various names, has continued to serve the surrounding community and expand its services. In 1967, as a reflection of this growth, the hospital was renamed Lakes Region General Hospital.

In January, 2000, the Hospital added the trade name LRGHealthcare to describe their growing continuum of services. No longer just a hospital, this organization had grown into a full healthcare system for Lakes Region residents. With 98 active staff physicians, 90 percent of whom are Board-certified, the hospital serves as a Level III Trauma Center, and offers a wide range of medical, surgical, psychiatric, diagnostic, and therapeutic services. LRGHealthcare also provides wellness education, support groups, and other community outreach services.

About Franklin Regional Hospital

Franklin Regional Hospital (FRH) is a community hospital serving 11 area communities, and is the distinguished recipient of the Foster G. McGaw Prize for Excellence in Community Service. FRH physicians provide a wide range of medical specialty areas including cardiology, ENT, family practice, gynecology, internal medicine, neurology, obstetrics, ophthalmology, orthopedic, pediatrics, podiatry, pulmonary medicine, rheumatology, and urology. The hospital also offers a full range of rehabilitation, education, and occupational health services. FRH also provides senior wellness and exercise classes at the Twin Rivers Intergenerational Program facility. FRH is currently adding services in areas of diabetes, heart failure, and wellness.

About IntraNexus

IntraNexus was established in 1992 and has worked to improve efficiencies in healthcare through technology solutions. For more than a decade, IntraNexus has delivered comprehensive consulting services in conjunction with the ALLEGRA HIS. The company's high quality, cost-effective solutions have positioned IntraNexus as a leader in development, implementation, and support of the ALLEGRA suite of applications. Recognizing the need for flexible and comprehensive solutions, IntraNexus developed a new web-based HIS system – **SAPPHIRE**[®]. Together, the ALLEGRA and **SAPPHIRE** solutions can support patient access, revenue cycle, and advanced clinical needs for any hospital or hospital system.
